NISCHAL BHANDARI

Full Stack Developer · AI / ML Enthusiast · BE Computer Engineering

itisnischal@gmail.com nischal-bhandari.com.np github.com/nis6hal linkedin.com/in/nis6hal
Pokhara, Nepal

OBJECTIVE

Final-year Computer Engineering student at Pokhara University with 2+ years of hands-on experience building production-grade full stack and AI-integrated applications. Seeking an AI/ML internship where I can apply skills in computer vision, NLP, and end-to-end system development to deliver real-world impact.

EDUCATION

BE Computer Engineering *2022 – 2026*

Pokhara University · Pokhara, Nepal

- Currently in 7th semester; expected graduation 2026.
- Coursework: Algorithms & Data Structures, Computer Networks, AI/ML, Software Engineering, System Design.
- Built multiple production-quality projects independently throughout the degree programme.

TECHNICAL SKILLS

Languages
Python · JavaScript · HTML5 · CSS3

AI / ML
NLP · TensorFlow · OpenCV · Computer Vision

Frontend
React · Three.js · GSAP

Backend & Databases
Node.js · Express.js · MongoDB Atlas

Mobile
React Native

Tools & Platforms
Git · GitHub Pages · Render · Figma

PROJECTS

AI Resume Analyser *2025 · In Progress*

- NLP-powered web tool that parses uploaded CVs and returns an ATS compatibility score, skill gap analysis, grammar feedback, and tailored improvement suggestions.
- Aims to help job seekers optimise their CVs against job descriptions using rule-based and ML-driven heuristics.

Python · NLP · Node.js · React

Sentiment Analyser *2025*

- Trained and deployed a text classification model to detect sentiment (positive / negative / neutral) in user-submitted text.
- Applied data preprocessing, tokenisation, and fine-tuning techniques to achieve reliable accuracy across diverse inputs.

Python · NLP · Machine Learning · TensorFlow

UniLib — Library Management System *2024*

- Full stack web application for university library operations: book catalogue, member management, issue/return workflows, and fine calculation.
- Designed RESTful API with role-based access control (admin / student) and an intuitive dashboard UI.

Node.js · Express.js · MongoDB · React

Smart License Plate Detection (SLPD) *2024*

Academic / Personal

- Edge AI system for real-time license plate recognition targeting automated gate control and parking management.
- Achieved 90%+ detection accuracy under varied lighting conditions with sub-100ms inference latency on low-power hardware (Raspberry Pi).
- Supports both Nepali and international plate formats with vehicle entry/exit logging to SQLite.

Python · OpenCV · TensorFlow · Raspberry Pi · SQLite

Personal Portfolio Website *2023 – Present*

- Production-deployed personal portfolio with a Three.js / GSAP-powered 3D particle hero, dynamic project grid, GitHub heatmap, and an integrated rule-based chatbot.
- Backend built with Node.js / Express and MongoDB Atlas, deployed on Render; frontend hosted on GitHub Pages with full admin panel for content management.
- Ongoing: Cloudinary image uploads, live GitHub API stats, and drag-and-drop project ordering.

HTML5 · CSS3 · JavaScript · Three.js · Node.js · MongoDB Atlas · Render

LANGUAGES

English — Professional fluency **Nepali** — Native **Hindi** — Conversational
